

## Curtain & Screen Management

J. J. Overseas has specially designed economical, single and three Phase Motorised Gearboxes, which can control the opening and closing of Curtains, Indoor Screen and Shade Nets, at a touch of button. With this state-of-the-art technology you and your entire team will be liberated from the tedious job of opening and closing the curtains and screens manually.

Further on, the whole equipment, since it is 100% made in India, it can be completely repaired by our dedicated team of professional and technical staff.

The greenhouses can also be controlled in order to satisfy the needs of the indoor climatic conditions, required for efficient growing. These automations have an optional function of controlling all the parameters required to controls temperature, humidity, and daylight, inside as well as outside the greenhouse.

This technology can be very effectively used for covering various places like Nurseries, Plant Hardening chambers, Open-Ground Wedding functions, Swimming Pools, Car parking, Open drying Areas, etc.

The system can consist of:

- ❖ One geared motor with limit switch for Screen or Shade Net for the entire Greenhouse. Four geared Motors with limit switch for Side Curtains, able to lift curtains up to 140 mtrs in length
- ❖ One Central Control Panel Board
- ❖ Temperature Sensors ( ) (Optional)
- ❖ Lux-meter (Sunlight Intensity Sensor) (1) (Optional)
- ❖ Relative Humidity Sensor ( ) (Optional)

Salient Features:

- ❖ Maintains optimal environmental greenhouse conditions
- ❖ Uniform motion Increases the life of Screen, Shade Net and Curtains
- ❖ Customised to fit the needs of any greenhouse
- ❖ Cost-effective systems for any budget
- ❖ Increases productivity and reduces costs
- ❖ Completely 100% made in India, hence easy AFTER-SALES-SERVICE

All the above factors help to achieve the best combinations and actions, which allow the most efficient indoor climate for growing.
